

REVENUE REPORT
ON THE
IRRIGATION WORKS
OF THE
AJMER-MERWARA DISTRICT,
FOR THE
YEAR ENDING 31ST MARCH 1910.

MOUNT ABU
PRINTED AT THE RAJPUTANA AGENCY PRESS
1911

RAJPUTANA AGENCY, Public Works Department, IRRIGATION BRANCH.

CHIEF COMMISSIONER'S REVIEW OF IRRIGATION WORKS, 1909-10.

No 57-S. of 1911.

Dated Mount Abu, the 27th January 1911.

READ:—

Endorsement No ^{116-F}₁₄₉ dated the 8th October 1910, from the Commissioner, Ajmer-Merwara, forwarding the Revenue Report on the Irrigation Works in Ajmer Merwara for the year 1909-10, together with the usual appendices

OBSERVATIONS.

1 The average rainfall during 1909-10 was 27.86 inches as against 32.65 inches in 1908-09 and a normal of 21 inches

2 From an irrigation point of view the year under report was an unusually good one

A record revenue was collected, but unfortunately working expenses were high. Consequently a low percentage of net revenue on capital has to be recorded

The financial result of the year are tabulated below —

Sub-Collectorate	TOTAL CAPITAL OUTLAY INCLUDING DIRECT CHARGES.		GROSS REVENUE COLLECTIONS.			WORKING EXPENSES			Net Revenue	Percentage of net revenue on capital at end of 1909-10
	During year	To end of year	Irrigation Rev. rupee.	Miscellaneous Receipts.	Total	Direct.	Indirect.	Total		
Ajmer	2,692	19,18,295	62,703	1,918	64,650	16,744	2,029	18,773	15,878	0.83
Brewar	2,611	11,06,610	55,710	972	56,712	38,450	1,536	39,986	18,716	1.09
Tolgarh	2,779	4,74,158	27,000	217	27,257	7,402	294	7,696	19,559	4.12
Total for 1909-10	8,082	34,29,063	1,45,482	3,137	1,48,619	60,606	2,859	63,465	51,173	1.57
Total for 1908-09	7,570	31,21,001	1,35,720	3,273	1,39,993	53,207	2,066	55,333	52,765	2.44

A diagram of financial records up to 1909-10 is attached.

3. The following table compares the revenue assessed for the year with the area irrigated and protected:—

SRI-CHANDRASEKHAR.	Irrigation Revenue assessed.	Area.			Assessment per acre.
		Irrigated.	Protected.	Total.	
Ahera —	Rs. 31,344	12,632½	9,151½	20,833	23½
Devara —	32,927	6,171½	6,427	12,598½	26½
Thalagudi —	23,095	3,932	1,451½	4,563½	53½
Total for 1909-10 —	1,41,366	22,736	17,030	41,330	237
Total for 1908-09 —	1,33,732	22,931½	14,807	39,837½	241

The irrigation revenue assessed includes all assessments due to protected as well as protected areas and also the total paddy assessments of—

1. Rs. 55,755 on crops irrigated from wells and
2. Rs. 7,335 on account of difference between dry and wet rates.

4. Of the irrigated area 9,387 acres were cultivated under *Sorghum* and 12,147 acres under *Wheat* as compared with 8,513 and 12,842½ acres respectively in 1908-09.

Excesses in the amount of Rs. 14,687 were surrendered during the year. The surpluses of revenue demand at the end of the year aggregated Rs. 47,470.

5. The working expenses were distributed as follows:—

Details of Working Expenses.	1908-09.	1909-10.	Increase (+) or Decrease (—).
New works, maintenance and repairs	25,722	34,806	+ 9,084
Establishment —	21,337	34,373	+ 13,036
Tools and Plant —	1,545	922	— 1,023
Leave and Pension allowances —	2,068	3,980	+ 1,912
Total — Rs.	50,672	74,081	+ 23,409

The working expense per acre irrigated and protected rose from 1-32 in 1908-09 to 2-27 in 1909-10, the increase being due to—

- a. Larger expenditure on new works on canals as shown below:—

Under Sri-Chandrasekhara:—

Restoration and improvements to Sagarput Tank, No. 64-163.

Building embankment and painting the brick wall of Rambari Tank, No. 52-232.

Strengthening dam of Kalyanput Tank, No. 50-543.

Revolving water cushions and gates for the weir of Devalla Tank, No. 33-251.

Revolving a water cushion 2 feet deep. Ahera Tank, No. 1-1.

Under Sri-Chandrasekhara:—

Enlarging masonry sluices of Lusani Tank-II, No. 64-233.

Restoration and improvements of Amargudi Tank, No. 1-163, and

(b) Larger expenditure incurred on the following repairs —
Ajmer Sub Collectorate —

Repairs to Baroli New Tank No 110

Repairs to Kesarpura Tank No 60 548

Entertainment of gangs repairing tanks Nasirabad Sub Division

Repairing Kesarpura Tank No 69 1174

Repairing and improving Chachawas Tank No 27 762

Beawar Sub Collectorate —

Repairs to Kariyala Tank at Rajor No 116 333

Repairs to Gyanwala Tank, No 119 66 at Rampura

Repairs to Bichuchora Tank, No 115 73

C The value of crops raised on 41 590 acres during the year was estimated at Rs 10 15 219 a record figure. The principal crops were wheat barley, mixed grains, cotton and maize and their estimated values were Rs 2 70 557, 1,84 601, 1 63 012 2 39,719 and 71 457, respectively

7 Experimental cuttings of crops were made in both the Districts. In the Ajmer district five staples (barley, maize, cotton, bejhar and gujji) were tried and in the Merwara district five staples (barley, wheat, maize, cotton and gujji) were tried.

The results are tabulated below —

Sub-Divisions	Crops	HIGHEST PRODUCT PER ACRE										LOWEST PRODUCT PER ACRE																		
		Grain		Stalks		Straw		Value		Total value		Expenditure		Profit		Grain		Value		Straw		Value		Total value		Expenditure		Profit		
		Md	a	Rs	a	Md	a	Rs	a	Rs	a	Rs	a	Rs	a	Md	a	Rs	a	Md	a	Rs	a	Rs	a	Rs	a	Rs	a	
Ajmer	Barley	35	0	50	0	33		13	0	63	0	31	0	33	0	8	0	16	0	9	20	4	4	20	15	0	21	1	0	0
Merwara	Wheat	15	30	47	4	37		3	8	50	12	50	0	30	5	8	10	9	3	9	5	3	21	8	0	18	0	3	0	

Statement VI appended to the report shows in detail the result of the above experiments

ORDERED — That this review together with the papers read in the preamble be printed, and 25 copies furnished to the Government of India under a covering letter, and that two advance copies be furnished to the India Office

H S WILDEBLOOD MICE

Secretary to the Honble the Chief Commissioner
of Ajmer Merwara in the P W D

Note by Mr H S Wildeblood M I C E Superintending Engineer,
Rajputana Public Works Department, dated 8th November 1910,
on the attached diagram of financial records of the Ajmer-
Merwara tanks

1 The diagram shows that the sum at charge which means the capital outlay plus the annual financial losses on excess of interest and maintenance charges over receipts by Government has steadily increased from about 35 to 45 lakhs during the past 10 years. Of this the actual capital outlay accounts for an increase from about 28 to 34 lakhs and the average annual loss on interest and working has been nearly half a lakh. During this period the percentage of net revenue on capital fluctuated between 1 and 3. This net revenue represents the difference between gross revenue and working expenses exclusive of interest and as interest charges are roughly about $3\frac{1}{2}\%$ the above net revenue is insufficient to cover them.

2 The value of the crops raised is another aspect of the question which mainly affects the inhabitants of the locality.

3 A possible justification for the increasing annual loss to Government and the general taxpayer would be a corresponding saving in famine relief expenditure but it is unfortunately not very clear that any such saving takes place for the simple reason that in a famine year when the rains fail the tanks are usually empty. They are therefore not famine protection works in the sense that canals fed from the Himalayan snows are. The result of the introduction of hundreds of tanks into Ajmer Merwara is to increase the population. This increased population has to be supported at Government expense in a famine year.

4 It is obvious that the annual loss to Government cannot be allowed to go on increasing indefinitely though it is not easy to suggest a remedy. There are however several alternatives which suggest themselves among which I should be inclined to put the following in the foreground.

- (a) The gradual replacement of the tail system by one of wells except in the case of tanks which are paying concerns.
- (b) The extension of forest area as a means of retaining the underground well water.
- (c) The building of masonry or puddle cross walls below ground level and across valleys with the same object.

5 I presume that the limit of desirable taxation of the benefitting landlords and tenants who raise the crops has been reached. This is a question for the revenue authorities.

H S WILDEBLOOD M I C E

Superintending Engineer P W D Rajputana

The Chief Commissioner is constrained to record his entire dissent from the personal views recorded in the above note by Mr Wildeblood. He considers that they indicate a completely erroneous view of the elementary meaning of a protective work.

The tanks in Ajmer Merwara have been constructed as protective works in a country which is peculiarly liable to famine and they have constantly justified their existence and the expenditure incurred on them notably in

1840, 1865, 1866, 1881, 1884, and 1888. These are only some well known instances. There have of course been years of deficient rainfall and famine, when the tanks have not filled ; but the fact that they have saved the situation in other years is sufficient, and besides this they add in normal years to the prosperity of the people, thereby giving them a better chance of withstanding scarcity or famine, when it occurs. The tanks, moreover, are admittedly of the greatest benefit in keeping up the water level of the wells situated below them. The addition of crops valued at over 10 lakhs as in the present year on tank lands only, must contribute largely to the power of resistance of the people, and there is a large area of well land which, though not included in the above, is indirectly dependent on tanks. The indirect benefits secured to the people by means of the tanks cannot be put into figures or shewn within the dry statistics of a report, but they are known to be very valuable. The argument used by Mr. Wildeblood based on the effect of tanks in increasing the population, is not a legitimate argument. It would obviously, if carried out to a logical conclusion, justify pure inaction in face of famine in a country where that calamity was to be expected.

The loss to Government in consequence of these tanks is not by any means so great as Mr. Wildeblood paints it. His high figures of annual loss are obtained by adding each year to the sum at charge the amount by which the profits fall short of normal profits. But there is no reason to calculate in this way. The following are the figures showing the percentage of net revenue on *capital outlay* during the last nine years:—

1901-02	3.00
1902-03	0.7
1903-04	2.6
1904-05	3.35
1905-06	1.53
1906-07	2.2
1907-08	2.35
1908-09	2.44
1909-10	1.57

If the unfavourable year, 1902-03, be excluded the return on capital outlay has averaged nearly $2\frac{1}{2}$ per cent., and it may safely be said that this is an extraordinarily high return to obtain on Protective Works.

The financial results of Protective Irrigation Works in the United Provinces for the same nine years show that the percentage of net revenue on capital outlay was a deficit quantity in 1901-02, 1902-03, and 1908-09, while in the remaining six years it averaged only .47.

The Chief Commissioner is of opinion that the tanks in Ajmer are a solid asset of great value to the Government and to the people, and that they have contributed largely to the security of the population against the miseries and risks of famine.

(Sd.) H. S. WILDEBLOOD,
*Secretary to the Hon'ble the Chief Commissioner
in the Public Works Department, Rajputana.*

REVENUE REPORT

ON THE

IRRIGATION WORKS

OF THE

AJMER-MERWARA DISTRICT

FOR THE

YEAR ENDING 31st MARCH 1910.

I Rainfall—The average rainfall during the year 1909-10 amounted to 27.86 inches as against 32.65 inches in the previous year and against a normal fall of 21 inches

From an irrigation point of view, the year under report was on the whole fair

II Classification of Tanks—There was no change in the classification of tanks during the year under report

III Capital Outlay—The total capital outlay to the end of March 1910 amounted to Rs 31,29,053. The expenditure incurred during the year was Rs 8,082 as detailed below—

DIRECT CHARGES—

Works establishment, tools and plant and suspense account, Rs 6,031

INDIRECT CHARGES—

Capitalization and leave and pension allowances „ 2,051

IV Assessed Revenue—The gross revenue assessed during the year under report is compared below with the figures of the previous four years—

	1908-09	1909-10
Ajmer	63,414	63,010
Merwara	75,259	79,860
P W D	237	469
Total	1,38,910	1,43,339

1909-10	Rs 1,43,339
1908-09	„ 1,38,910
1907-08	„ 1,45,410
1906-07	„ 1,41,463
1905-06	„ 83,156

The assessments of 1909-10 and 1908-09 for the different classes of tanks are compared in the following table—

Class of Tanks	1908-09			1909-10			Difference
	Ajmer	Merwara	Total	Ajmer	Merwara	Total	
	Rs	Rs	Rs	Rs	Rs	Rs	Rs
Crop rate Tanks	4,768	10,620	15,388	6,030	14,185	20,215	+4,827
Variably assessed Tanks	34,478	19,663	54,141	34,013	20,419	54,432	+291
Fixed Tanks	6,038	17,759	23,797	5,592	18,039	23,631	-166
Share of well assessment and difference between wet and dry rates	15,976	27,217	43,193	15,976	27,217	43,193	
Miscellaneous	2,154		2,154	1,399		1,399	-755
Total	63,414	75,259	1,38,673	63,010	79,860	1,42,870	+4,197
ADD—amount realized by the Public Works Department	27	210	237	153	316	469	+232
Grand Total	63,441	75,469	1,38,910	63,163	80,176	1,43,339	+4,429

V. *Assessed area*.—The total area assessed for both the harvests amounted to 41,590 acres as against 39,698 acres in the preceding year. It is compared below with the figures of the previous five years:—

Years.	Acres.
1904-05	21,173
1905-06	11,866
1906-07	34,115
1907-08	38,103
1908-09	39,698
1909-10	41,590

The figures of the *kharif* and *rabi* cultivation of the two previous years are compared with those of 1909-10 in the following table:—

Years.		<i>Kharif</i> .	<i>Rabi</i> .	<i>Total</i> .
		Acres.	Acres.	Acres.
1907-08	..	18,340	19,763	38,103
1908-09	...	13,824	25,874	39,698
1909-10	...	15,579	26,011	41,590

VI. *Demand, Collections and Balances*.—The following table shows the figures of the demand, collections and balances of the year 1909-10 as compared with those of the five previous years:—

District or Tehsil.	Assessment of the year.	BALANCE OF LAST YEAR		Total.	DEDUCT FOR THIS YEAR.					Actual Collections.
		Due at the end of the year	Not due at the end of the year.		Balance due at the end of the year including suspensions.	Balance not due at the end of the year.	Remissions.	Adjustment of excess collections.	Total.	
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Ajmer	63,010	6,577	28,143	97,730	2,514	28,234	2,486	...	33,234	64,496

Total	1,42,870	31,057	60,899	2,34,826	6,327	60,743	19,636	...	86,706	1,48,120
Add—amount realised by the Public Works Department ...	469	469	469
Grand Total ...	1,43,339	31,057	60,899	2,35,295	6,327	60,743	19,636	...	86,706	1,48,589
Figures for.—										
1908-09	1,38,910	58,807	47,359	2,45,076	31,057	60,899	14,287	...	1,08,243	1,38,833
1907-08	1,45,410	41,509	44,394	2,31,313	58,807	47,359	6,936	...	1,13,102	1,18,211
1906-07	1,41,463	44,392	20,978	2,06,833	41,509	44,394	8,372	...	94,275	1,12,558
1905-06	83,156	24,435	23,380	1,30,871	44,392	20,978	3,608	...	68,978	61,893
1904-05	1,10,120	27,092	37,561	1,74,773	24,335	23,360	1,970	...	49,685	1,25,088

VII. *Remissions and Suspensions*.—Out of the total demand of Rs. 2,34,826, the amount remitted during the year was Rs. 19,636 excluding Rs. 89 on account of the year 1909-10, which will be taken into account next year.

VIII. *Working Expenses*.—The working expenses amounted to Rs. 94,466 as against Rs. 55,333 in 1908-09 and Rs. 37,852 in 1907-08. The details of expenditure in accordance with the statement furnished by the Examiner,

Public Works Accounts, are set forth below —

*Works and Repairs	Rs 54,808	(a) Revenue management	Rs 8 601
Establishment	" 26,375	(b) Cost of maintenance	" 82,005*
Tools and Plant	" 822	(c) Indirect charges	" 3,860
Total	Rs 82,005	Total	Rs 94 466

The expenditure of the year as compared with that of the previous year, shows an increase of Rs 39 133

IX *Percentage on Revenue and Area assessed*—The working expenses, which amounted to Rs 94 466, were below the gross revenue (Rs 1,43 339) assessed for the year under Report

The incidence of the working expenses on the area assessed was Re 1 on 44 acre

X *Net Revenue and the results of the year's working*—The net revenue was as under —

Revenue collections	Rs 1,48 589
Deduct—Working expenses	" 94 466

Net Revenue Rs 54 123

XI *Experimental cuttings*—During the year, experiments were made for ascertaining the outturn of cotton barley maize bejar guji and wheat. The results are shown in Statement No VI prescribed under rule 53 of the Ajmer Irrigation Rules

XII *Measurement of water in wells*—The measurement of the spring level of 474 wells was taken in September 1909 and April 1910 by the Revenue department. These wells are classed as under —

	Benefitted by Tanks	Independent of Tanks.
Ajmer	66	38
Merwara	201	169
Total	267	207

Detailed information for Ajmer and Merwara regarding these wells will be found in separate Statement No VII appended to this report

XIII *Area and value of different kinds of crops*—The total area and estimated value of the produce of different kinds of crops irrigated in 1909-10 and 1908-09 are compared in the following table —

DISTRICT	CROP RATE TANKS		FIXED AND VARIABLE TANKS		TOTAL FOR 1909-10		TOTAL FOR 1908-09	
	Area	Estimated value	Area	Estimated value	Area	Estimated value	Area	Estimated value
	Acres	Rs	Acres	Rs	Acres	Rs	Acres	Rs
Ajmer	1,437½	40,016	19,412½	5,35,620	20,850	5,75,642	18,044½	4,62,000
Merwara	3,206½	82,145	19,101	3,57,462	22,307½	4,39,607	21,653	4,50,000
Total	4,644	1,22,161	38,513½	8,93,082	43,157½	10,15,249	39,697½	9,12,000
